

ENHANCE YOUR ORGANISATION'S AGILITY WITH MODERN BUSINESS APPLICATIONS THROUGH OUR GUIDED ASSESSMENT.

If you're grappling with outdated applications and excessive operational overhead, our solution offers a clear path forward to modernise and scale your application architecture.

We understand the importance of a well-defined roadmap to modernisation, including cost estimates and a vision for the future state of your applications. By leveraging Azure Cloud Native solutions, we empower you to adopt a modern, scalable and secure application platform, following industry best practices.

Start your modernisation journey with confidence, supported by a clear roadmap leveraging reusable frameworks and aligning to best-practices to ensure your architecture is optimised for future scale and productivity.

Why customers use Arinco's Application Assessment:

This 2 to 4-week engagement is relevant if you want to:

- Modernise legacy or end-of-life applications
- Enhance maintainability of software
- Leverage scalable app infrastructure with low operational overhead
- Define a clear roadmap, with costings, migration plan and future state architecture
- Accelerate your adoption of Azure cloud native solutions and scalable and secure applications.
- Enable faster time to market for new features and capabilities and enhance agility

ASSESS & EVALUATE

Identify and assess applications, aligning them with the 5 R's of cloud rationalisation.

ROADMAP

Define the modernisation plan, delivering a clear roadmap of migration and modernisation, including costs and future-state architecture.

EXECUTE

Align the roadmap with a plan to execute and deliver effectively.

Key Deliverable: Roadmap to modernise application architecture
