

UNLOCK THE FULL POTENTIAL OF YOUR DATA ESTATE WITH OUR GUIDED ASSESSMENT

Embark on your data modernisation journey from on-premises to the cloud, starting with an assessment of your current state. Whether you're new to Azure or aiming to revitalise your brownfield setup, this assessment is for you.

As Data experts, we'll uncover gaps or areas for improvement in your data landscape. You'll receive a clear roadmap outlining the next steps, along with transparent costings. If you're curious about how this all fits together, we'll demonstrate the proposed solutions through a proof of concept (POC).

With our guidance, you'll navigate the data landscape with confidence, unlocking its full potential for your organisation.

Azure Databricks

Microsoft Fabric

Why customers use Arinco's Data Assessment:

This 2–6-week engagement is relevant if you want to:

- Shift data from on-premises to the Cloud for the first time, ensuring it's done right, the first time
- Review existing underperforming Brownfield environments and assess costs, security and scalability
- Implement modern analytics and determine the cloud solutions that best suit your business needs
- Review and enhance underperforming brownfields implementations

ASSESS

Evaluate your organisations' data maturity and data capability requirements in line with your business strategy.

SOLUTION PROPOSAL

Design the right solution for your business circumstances and quickly extract value from your data assets, with minimal upfront efforts.

ROADMAP

Identify a clear roadmap of the journey ahead, with detailed costings, and options.
If applicable, a proof-of-concept will be developed.
