

HARNESS THE POWER OF CLOUD-NATIVE ANALYTICS AND REPORTING WITH SECURITY AND SCALABILITY

Embrace cloud-native enterprise reporting, modern DevOps practices, and governable self-service analytics with our tailored offering, designed to meet your unique business needs.

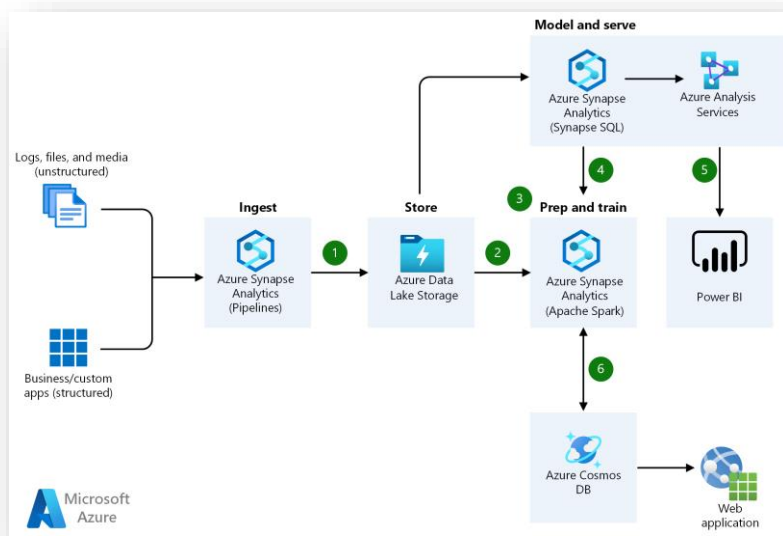

Providing comprehensive data insights, our Enterprise Analytics Accelerator uplifts your existing analytics capabilities with improved governance and DevOps operating models.

Safely and securely enhance your self-service analytics capabilities with a powerful and robust solution.

Why customers use Arinco's Enterprise Analytics Accelerator:

This 6 to 12-week engagement is relevant if you want to:

- Adopt or uplift your enterprise modelling and reporting with modern DevOps practices
- Enhance the quality of your enterprise reporting, boosting performance and reliability
- Implement governable self-service analytics
- Increase security and governance on organisational data
- Implement cloud-native analytics and reporting in a sustainable, scalable manner

ASSESS

Evaluate your current enterprise analytics capabilities, including security and governance controls.

DESIGN

Design a customised analytics solution, involving metadata driven frameworks, IaC and DevOps.

HANDOVER

Handover and align with your data team to ensure usability and future scalability.
