

Azure Done Right™

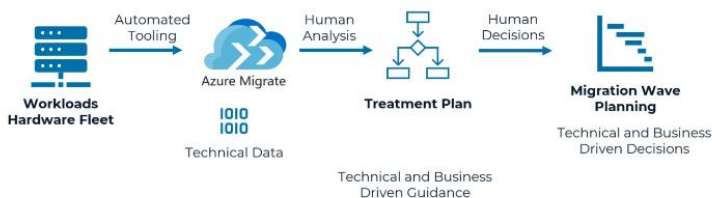

Migration Accelerator

MIGRATE TO AZURE WITH THE RIGHT FOUNDATIONS, ENSURING A SECURE, STABLE AND SCALABLE PLATFORM TO INNOVATE IN THE CLOUD.

We believe the right skills and capabilities are essential in establishing an Azure migration program. The risk and cost associated with a badly managed Azure Migration can be significant.

Arinco's Azure migration process works to alleviate business concerns about migration challenges, focusing on reduction of risk and ensuring your deployment is aligned to Microsoft's Cloud Adoption Framework.

We will enable your team to focus on what really matters – empowering your business with modern cloud services and improving your customer outcomes.

Why customers use Arinco's Migration Accelerator

This 5 to 8-week engagement is relevant for you if you:

- Want to selectively migrate to cloud at scale with repeatable processes using insights.
- Want to leverage a repeatable, established framework for moving to Azure.
- Have deployed an Azure landing zone and are unsure of the best process to move key business services from your on-premise data centre.
- Wish to accelerate your migration of services to Azure or meet a specific business deadline.
- Need assistance to understand the dependencies, risks and relationships that exist within your migration program.

CURRENT STATE ASSESSMENT

Understand foundational gaps across Azure: Identity, RBAC, Security, Governance and Policies.
Develop dependency maps, migration plans and support documentation.

MIGRATE WORKLOADS

Migrate your development workloads to Azure.
Monitor and optimise your migrated workload for performance, cost and stability.

UPSILL AND ONBOARD

Guidance and education on operations within Azure. Ensuring that you are well placed to run the new Azure deployment.
Onboard your migrated services to Azure services.

Key Deliverables: Current state insights, data collection at scale, templated migration processes and dependency mapping.
