

SEAMLESSLY ADDRESS CODE AND INFRASTRUCTURE VULNERABILITIES WHILE EMBRACING MODERN SECURITY BEST PRACTICES.

The Platform Security Accelerator is your comprehensive solution for addressing the intricate challenges of modern security in software and infrastructure delivery. With a focus on DevSecOps, we enable you to assess and remediate code vulnerabilities while seamlessly integrating security into your development pipeline. Bridge the gap of code expertise and experience with Arinco's deep experience in managing infrastructure security and policy-as-code.

Our experience with Microsoft's cloud security posture management tools extends protection to your infrastructure, providing comprehensive compliance checks and vulnerability scanning. All our solutions implemented adhere to security best-practices and provide assurance with comprehensive documentation of standards on your unique compliance requirements.

Why customers use Arinco's Platform Security Accelerator

This 8-week engagement is relevant for you if you:

- Want to secure software and infra delivery gaps with modern practices and guardrails.
- Wish to remediate code vulnerabilities and implement security into your development pipelines.
- Are required to meet strict regulatory and compliance standards relevant to your industry.
- Want to assess and remediate Cloud Security posture management.

ASSESS & ANALYSE

Assess & analyse your current tooling and processes, including existing maturity level and potential gaps against industry benchmarks and best-practices.

DESIGN

Outlined plan to address high priority gaps and confirm target environments for remediation.

IMPLEMENT & REMEDIATE

Deploy agreed solution to address platform security gaps and pilot testing on priority remediation before roll-out of full-scale remediation.

Key Deliverable: Assessment report, design of future target state and implementation of recommended solution
