

LEVERAGE THE AZURE CLOUD WITH OUR SCALABLE, SECURE AND OPTIMISED SOLUTION

Microsoft Azure Virtual Desktop (AVD) provides a simplified management platform optimised for Windows 10 and Office 365.

Our Virtual Desktop Accelerator helps you leverage the power of the Azure cloud platform, so you can quickly scale to support the needs of all your employees with modern workplace and remote working scenarios.

Arinco's expertise in both Azure and Microsoft 365 technologies provides the perfect blend for fast tracking your enterprise's adoption of this solution.

Why customers use Arinco's Virtual Desktop Accelerator:

This 5-week engagement is relevant if you want to:

- Quickly scale and deploy virtual desktops or apps to your remote employees
- Utilise modern security controls to enhance your remote working scenarios
- Deploy new greenfield environments or enhance your existing Azure Platform

ASSESS & DEFINE

Understand your environment pre-requisites to successfully deploy AVD, defining and configuring your AVD tenant.

DEPLOY

Deploy your AVD solution as a pilot and identify areas for improvement, fine tuning your solution.

REFINE & OPERATIONALISE

Secure, monitor and automate scaling of your AVD tenant.
